

# MSP and MSSP Program

## Help Your Customers Address Critical Mobile Security Gaps while Maximizing Profitability.

### Purpose-Built MSSP Program to Meet Today's Mobile Security Demands

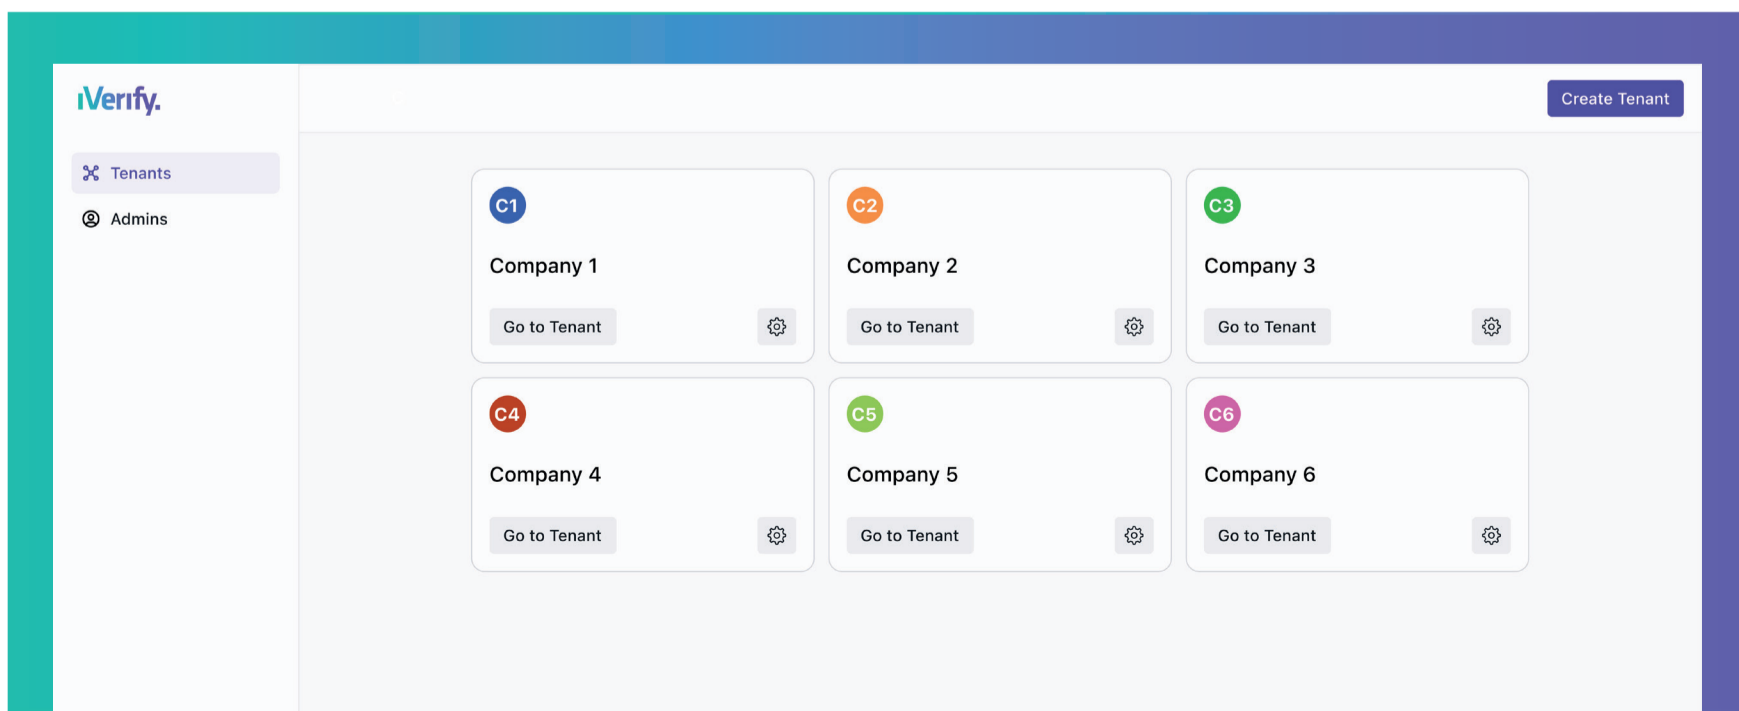

iVerify assists MSPs and MSSPs in effectively addressing their customers' mobile security demands with streamlined service delivery models designed to maximize value and profitability.

- Multi-tenant customer management offers streamlined operations and full visibility across your customers through a multi-tenant portal.
- Easily provision customer assessments to quickly initiate and demonstrate value and effectiveness.
- Benefit from maximum flexibility with customizable customer requirements and quarterly usage-based billing.
- Access to iVerify's support team dedicated to your success across partner

### Complete Mobile Security

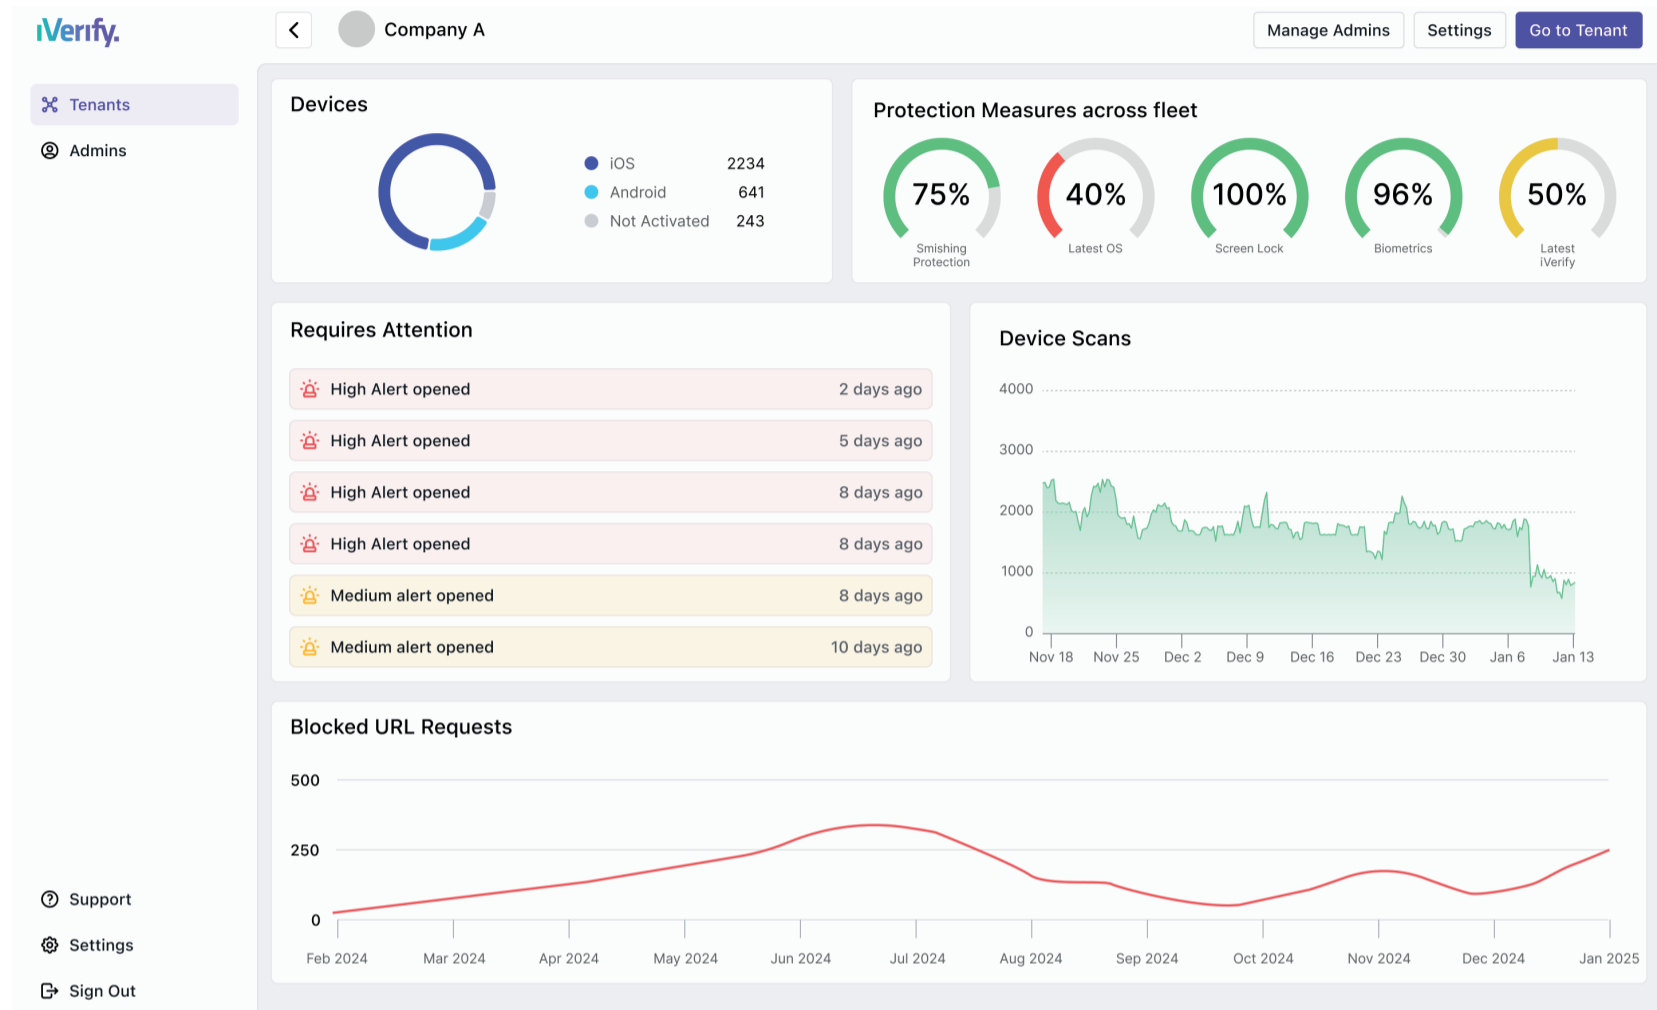

iVerify assists MSPs and MSSPs in effectively addressing their customers' mobile security demands with streamlined service delivery models designed to maximize value and profitability.

- Zero-day threat protection at the operating system level
- Mobile BYOD Protection with privacy-first features
- Enterprise-grade Mobile EDR with comprehensive threat detection and response
- Elite services, including managed mobile threat hunting
- MDM-less conditional access capabilities which block the device, not the user
- DNS-based smishing protection with optional loopback VPN for fine-grained management

## Comprehensive Multi-Tenant Management Portal

- Multi-tenant customer management
- Single-click service provisioning and easy-to-use interface
- Real-time dashboards with user-detailed reporting and actionable intelligence
- Detailed analytics on scans, vulnerabilities, and threats timeline

### Program Benefits

- Three tiers of service: Bronze, Silver, and Gold
- Deal Registration
- Sales and Technical Training and Education
- Co-Marketing Opportunities

### Solution Packages

- **Business:** iVerify EDR solution with smishing protection and end-user sysdiagnose uploads
- **Enterprise:** Choose between BYOD or managed devices deployments, plus managed threat hunting, incident response, and forensics
- **Government:** Self-hosted cloud service and white label options available on request and subject minimum contract values

### Add Ons

- Premium Support
- Threat Intelligence
- Onsite Threat Hunting Training

# iVerify.

iVerify believes users shouldn't have to sacrifice privacy for security. Our easy-to-deploy solution provides fleet-wide iOS and Android security telemetry without requiring a management profile on the device. This lets users keep their personal data private and secure their mobile devices from advanced malware, vulnerabilities, and targeted attacks.
